Ref: Qualification of AWTS, Inc.

Dear Sir (Madam),

We are pleased to provide the following information as related to the qualification of AWTS, Inc.

In July 2009 we entered a contract with AWTS, Inc. regarding development of a 600 cubic meters per day high purity water treatment system for Arab Potash Company's chemical manufacturing plant in Jordan. The high purity water system is designed on the basis of Best Available Technology in the USA, built to the American and Jordanian standards of high quality and workmanship. Our system includes three multimedia filters, two double pass RO systems, two mixed bed demineralizers, fully automatic control system and auxiliary equipment.

During our association we have had excellent working relationship with AWTS Inc, and we are pleased with the quality of workmanship and attention to the details in all areas of plant design, fabrication, installation and startup. Accordingly, we would not have any hesitation to recommend AWTS Inc for any areas related to their line of work.

Sincerely,

Deputy General Manager/ Technical

Gary Phillips
